

Product Requirements

Article description

article	Necklace And Bracelet
article number	13895_13896

material	Polymer, glass, acrylic, nylon, brass Packaging: cardboard, polymer
category	Bedarfsgegenstand / commodity goods LFGB §2 (6) Abs. 6, contact to skin
product labeling ProdSG	German Product Safety Act (ProdSG) Produktsicherheitsgesetz - address of manufacturer or responsible trading company on product and packaging - definite identification of the article - instruction to use if required
Valid for	Germany EU regarding to EU - wide applicable regulations
Version	01_2019 Ansgar Wennemer, wennemer@de.tuv.com

Test requirements

material/ parts	required tests	test method	requirement	legal require- ment	voluntary test	test report required
entire product	Odour	SNV 195 651, scale 1-5	no claim, max. grade 2	x	x	
Metal parts - prolonged contact to skin	nickel	EN 1811 EN 12472	0,5 µg/cm²/week	x		X attention pas without uncertai nty
metal	Total content of cadmium	Microwave digestion	REACH Annex XVII < 100 mg/kg (12_2011)	x		x
metal	cadmium	EN 1122, 04/95, ISO 17294 - 2/2003	cadmium, <100 mg/kg- annex XVII Reach	x		
metal parts Crystal (Please do not test them all individually but only once, as the stones are the same for all of them.)	lead	EN 1122, 04/95, ISO 17294 - 2/2003	lead <500 mg/kg annex XVII Reach	x		
natural materials feather	PCP, TeCP	extraction, GC-MS	"Chemikaliengesetz" (Chemicals Law), Article 15, Annex to § 1, Valid for all products, materials 5 mg/kg 0,5 mg/kg	x	x	x
Packaging Please do not test them all individually but only once, as the packaging is the same for all of them	lead, cadmium, mercury chromium-VI as chromium total	Packaging Ordinance, 94/62/EC, EN 1122, 04/95, ISO 17294 - 2/2003	total, <100 mg/kg	X		X No test of paper, cardboard

REACH relevant (SVHC)

material/ parts	required tests	test method	requirement	legal require- ment	voluntary test
Crystal (Please do not test them all individually but only once, as the stones are the same for all of them.)	Arsenoxid (Arsen)	Total digestion, ICP-MS	< 0,1% duty to inform clients	X

The scope of testing is determined based on legal (i.e. German law) and additional test requirements that have been selected based on many years of experience in product testing and considering relevant exposure scenarios. This means the additional tests recommended mainly focus on those harmful substances that could be present as a result of the choice of material and or production processes.

Die Auswahl der gesetzlichen (Grundlage: Deutsches Recht) und zusätzlichen Prüfanforderungen erfolgt auf der Basis langjähriger Prüferfahrung nach dem Grundsatz der Verhältnismäßigkeit und unter Berücksichtigung relevanter Expositionsszenarien. D.h. die vorgeschlagenen Untersuchungen konzentrieren sich auf produktionsbedingte und materialspezifische Schadstoffgehalte.
